

**John Stuart Reid,
Elena Danaan,
Baptist de Pape,
Marijn Poels, Erik
Laarakker, prof.
Pierre Capel and
more...**

On 18 and 19 September 2026,
LightHouseTV will host a unique event.
Battle Beyond Science is all about
frequencies. Inspired by international
scientists and thinkers, we go beyond data,
models and consensus. Where science no

longer has answers, it becomes really interesting!

Book your tickets now! ➤

About the event

At this exact moment, millions of invisible frequencies move through your body and the space around you. Radio waves, wifi, bluetooth, light, sound, magnetic fields and maybe even signals that we do not yet fully understand. You can't see them. You can't hear them. You may feel them unconsciously. But what if they have a lot more influence on your life than you realize?

What exactly is a frequency? And when everything in the universe vibrates, resonates and has its own frequency, what role do those invisible forces play in our daily lives?

That is one of the questions we will be investigating during the very first edition of Battle Beyond Science on September 18 and 19. After the great success of Battle For Science in February this year, where the state of science was central, we are now looking for answers to questions that science has no or no answer to.

What influence do frequencies have on our body? To our health? To our emotions? And on our consciousness? And... if that influence is there, how does that work?

Well, we're going to visualize that. On large screens we show live how sound, water, light and vibration translate into impressive patterns and shapes. Not just to see, but especially to learn, experience and feel. Be surprised by inspiring lectures, live experiments with remote viewing, telepathy, time travel, quantum mechanics and sound healing sessions that bring together science, wonder and experience.

The line-up

We are busy talking to some very special speakers for this event. Now we have a beautiful line up:

► John Stuart Reid

A Scottish researcher and inventor who became known worldwide for his pioneering work with **cymatics**: making sound and vibration visible by allowing frequencies to move water, liquids and other materials in geometric patterns. His work impressively shows that frequency can organize matter, making him a much sought-after speaker at the intersection of acoustics, science and consciousness.

An author, speaker and former archaeologist who is internationally renowned for her work on alien civilizations, consciousness and the origins of humanity. In her books,

lectures and interviews she shares her vision of cosmic history, interstellar contacts and the development of human consciousness. Her work has a large number of followers worldwide and evokes both a lot of interest and discussion.

► Dr. Melvin Vopson

A physicist known for his bold research into the role of information as a fundamental building block of reality. With theories such as the **second law of infodynamics** and the hypothesis that our universe may behave like a giant computer, he challenges the limits of modern physics and stimulates the worldwide debate about the nature of reality.

► Dr. Erik Laarakker

A holistic veterinarian and researcher who has been investigating for more than thirty years how **water, light and frequencies** can support the self-healing capacity of humans and animals. With his work on **Information Medicine** and the fundamental importance of natural sunlight for health, he challenges the conventional view of medicine and invites a broader vision of health and biology.

► Marijn Poels

An independent documentary filmmaker who, with his **Primordial Code** trilogy, including **The Burning Essence**, searches for the deeper origins of man, consciousness and the hidden principles of nature, frequency and reality. His films

combine personal journeys of discovery with conversations with scientists, doctors and thinkers, and invite the audience to look beyond the boundaries of mainstream science.

► Baptist de Pape

Author, filmmaker and founder of the Remote Viewing Club, where he teaches people how to develop and investigate their intuitive perceptions according to a structured method. After the global success of *The Power of the Heart*, he focuses on whether human consciousness can perceive information beyond the limits of time and space, and how those abilities can be practically applicable.

► Prof. dr. Pierre Capel

Emeritus professor of experimental immunology who spent years doing fundamental research into the immune system. Today, he explores how emotions, consciousness, epigenetics and insights from **quantum mechanics** can enrich our understanding of health and reality, and takes his audience to the border where biology, physics and consciousness meet.

► Sound Healing musicians

There are musical performances by musicians, experimenting with variations in the number of hertz.

Location

Battle Beyond Science takes place in Building 055, Condorweg 1, 7332 AC Apeldoorn. The location is only a few minutes walk from Apeldoorn Central Station. Parking is possible nearby and is affordable. The location is wheelchair-friendly and equipped with toilets for the disabled.

In the large, plenary room there are 750 seats. In the foyer is a comfortable bar that is equipped with everything. The location and large room can be viewed on [the website of Gebouw 055](#).

Times

The doors open at 12:00 and the event starts at 13:00.

13:00 – 15:00 workshops

16:00 – 17:30 remote-viewing session with Baptist de Pape

17:30 – 19:00 break and opportunity to dine

19:00 – 22:00 panel session, plenary talk and sound healing performance

22:00 – 23:30 drinks and aftertalking in the foyer

Note: there are various high-quality food trucks at the entrance where you can dine at your own expense.

Tickets

The ticket price for one day Battle Beyond Science is € 150. Early bird tickets fees € 140 and are available until 18 August 2026.

NOTE: Eventbrite currently has a "bug" on Ideal payments. In the final phase, processing remains attached. Then click on "Try again" and the payment can be completed.

Why this price?

In addition to the costs for the location, technology and crew, the many international speakers apply hefty daily rates. They also need to be flown in from distant countries, get expense reimbursements, sleep in hotels and also have to dine. In short, the cost is immense and many times higher than with the Battle For Science. That forces us to adjust the price. In addition, there is now also a day program in addition to the evening program. You get more than just a panel interview. A meager consolation...obviously every euro we have left is for the benefit of the mission of LightHouseTV.

If you have any questions regarding this evening mail to flavio@lighthouse.tv
