

Congress "Technologies for the Future"

*From Friday 29 September to Sunday 1 October 2017
at the Hotel Novapark, Fischeraustraße 22, 8051 Graz / AT
<http://www.novapark.at/>*

Inspiring atmosphere

The Hotel Novapark is easily accessible from all over the world and is situated decentral in the green. It is the largest conference hotel of Graz. In addition to 150 inexpensive rooms (single room 76 euros, double room 56 p.p.) the hotel also offers a 3'000 m² wide wellness oasis.

The journey to this hotel alone is an experience and leads through very breathtaking alpine valleys, gorges and high plains.

Location, transport connections

Bus and tram:

From the main train station to the hotel Novapark: Bus line 52 direction Andritz - get off at the stop Exerzierplatzstraße.

From the main square to the hotel Novapark: tram 1, 3, 6 or 7 in the direction of the main station - get off at the Peter-Rosegger-Haus and change to the bus line 67 direction Zanklstraße and get off at Fischeraustraße.

By train:

Every day Deutsche Bahn offers at least two direct connections to Graz by road (with EC):

- from Saarbrücken directly to Graz;
- from Frankfurt directly to Graz;
- further direct connections from Darmstadt, Mannheim, Heidelberg, Stuttgart, Ulm, Augsburg, Munich

For 39.- Euro you can travel to Steiermark with the Europe-Special!

By car:

Coming from Salzburg:

A9 direction Graz - exit 175 direction Graz Nord / Zentrum - after 3,6 km turn left into Exerzierplatzstrasse (before Interspar), after 350 m turn right into Fischeraustrasse.

The Hotel Novapark is comfortable, generously designed, with nice ponds, green parks and a great wellness-oasis.

Coming from Vienna:

You take the A2 direction Graz - exit 179 / Graz Ost direction Raaba / Liebenau / Messe / Graz - East / Graz - Puchwerk / St. Peter - after 4,42 km turn right onto Conrad-von-Hoetzendorf-Straße - after 1,06 km turn right - after 375 m turn left onto Schönaugürtel - after 1,43 km turn right onto Lazarettgürtel - after 4,73 km. Turn right into Exerzierplatzstraße - after 345 m you turn right into Fischeraustraße.

Parking:

There are some 250 outdoor and underground parking, free for guests of the hotel.

Catering

Attention: The participants can register for the Fr.-Dinner, Sat.-Lunch and-Dinner and Sun.-lunch. The buffets (also vegetarian!) are nice, rich and inexpensive.

Rooms, other hotels

Rooms at the Novapark are offered according to the motto "pay 3 star, live 4 star"! The prices of the rooms are very low (SR 76 Euro, DR 56 p.P.), but very comfortable.

Rooms are offered according to the motto "3 star pay, 4 star living" and are cost-effective. Rooms are available under code "Jupiter" until July 30th.

Highlights of the congress "Technologies for the future"

From Friday September 29th to Sunday October 1st 2017
at the Hotel Novapark, Fischeraustraße 22, 8051 Graz / AT

The conference will be a powerful event, the hotel is situated in a green landscape, the pioneers presents their projects for the environment and the people. The participants are full of pace and enthusiasm!

Friday, September 29th

Gustav R. Grob from ISEO

Gustav R. Grob, President of the UNO-accredited International Sustainable Energy Organization ISEO, reports about contacts and projects of the organization that has

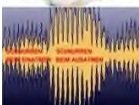

been active for 25 years.

The methanol revolution ...

... is presented by **Prof. Dr. Urs Weidmann** - as part of the Energiewende. Methanol is a cost-effective, ecological fuel that can be used both stationary and mobile. Prof. Weidmann has received environmental awards at home and abroad. It demonstrates the function.

The Cat Purring Generator

Unbelievable, but true: the cat craving device named KST-2010 heals! Diabetes, asthma, coma, depression, arthritis etc. The research team from Graz around **Dr. Fritz Florian**, Dr. Kurt Pinter and Dr. Günter Stefan simulated the purring of a cat and offered it for human medicine. The device is presented by the developer **Ing. Joachim Galler**.

Plant growth to zero tariff!

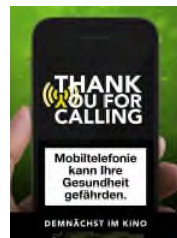

Dr. Fritz Florian presents in his book "plant code decrypted" for everyone the possibility to grow primal plants to the zero tariff, without pesticides! He points out that hunger is not necessary. This method is presented by **Mrs. Dipl.-Päd. Christina Florian**.

Material recycling - a win-win situation

Fabio Maggiore, manager of the Italian company ORIM, shows how recycling can be recovered by precious metals such as gold, silver, palladium, platinum and copper - a win-win situation: on the one hand an environmental problem (waste) is solved. On the other hand the recovered material can be used in a lucrative way in the electroplating, photo and gemstone industry.

Negative electrosmog becomes a positive life energy

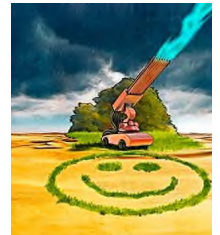

The electric smog problem was never shown as drastically as in the movie "Thank you for calling". A part of it is shown in the **Friday evening program**.

At the same time, **solutions** to the e-smog-problem are presented showing how e-smog can be converted to positive life energy, as with the **Vita chip by Peter Andres**, CEO of SwissMedtechSolutions AG. On the other hand, with the **two-chambered tube** and the good-weather-device of **Dr. sc. Florian König** from FKE Enterprise GmbH.

Saturday, September 30th

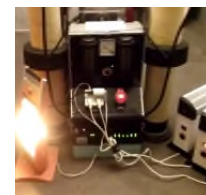

The desert becomes a green paradise!

What **Ing. Majid Abdellaziz of Green-Desert** has succeeded, one can hardly put into words: Where formerly in the desert was only sand, blooms new life today!

This was made possible by the **Cloudbuster after Wilhelm Reich** and by the planting of over 40'000 trees, each of which has a godfather or godmother.

Autonomous 7,5 kW generator from Croatia - with demo!

What has not been possible so far is now becoming reality: a Zagreber company offers **autonomous 7.5 kW generators** that make every household energy-efficient. Do not be afraid of power failure! A representative from Innovatehno demonstrates a device!

Prototype shows: radioactivity is reduced!

The consultant for space energy **Gabriele Schröter** has developed - corresponding to inspirations - a prototype (in Dodecahedron form), which enables **the reduction of radioactive radiation via resonant coupling**.

Thanks to the cooperation with experts and measurements in relevant institutes it was possible to establish: The principle works!

LENR in experimental evidence

Prof. Francesco Celani from the Istituto Nazionale di Fisica Nucleare,

Frascati / IT, is one of the best known researchers in the field of Low Energy Nuclear Reactions LENR. In the near future it will be possible to drive electric cars with LENR (cold fusion) and to provide consumers with energy.

Dispose of garbage on islands and plastic in the sea with ships

Garbage on islands and plastic on and in the sea are among the greatest current environmental problems. **Dirk Lindenau**, CEO of Maritime Engineer-

ring & Projecting, Kiel / DE, has been working to solve these problems for four years. He shows: It is also possible to work with discarded ships. Main issue: The problem is being tackled!

Healthy Food, Green Energy - Initiative of the United Nations Organization ISEO

Martina Sumenjak of SLOBIOM and Vice-President of the organization ISEO draw on a wealth of knowledge. It has established the International Initiative for Organic Agriculture and Healthy Food, Renewable Energy and Raw Materials, which is located in Slovenia but is active worldwide. Her goal: sufficient food and green energy for all.

Autonomous hydraulic power generator from Russia

The **Saturday evening** is dedicated to this unrivaled Russian project.

Adolf Schneider et al. reports on the state of the development of the hydraulic power generator of **Dr. Vladislav Marukhin**, cooperation and marketing. It is an industrial device, the plant shown here has a remarkable performance from 1 MW.

Sunday, October 1st

"Book of Synergy" for sustainable development

For decades, the Syrian born translator and journalist **Achmed Khammas** has been collecting information about sustainable projects and published them in his "Book of Synergy".

In the meantime, this internet database has many thousands of pages and is a regular **gold pit** for projects for a healthy environment. The speaker presents the participants some special gold grains.

Space Energy - Solutions for the Future

Dr. Thorsten Ludwig, President of the German Association for Spatial Energy (Deutsche Vereinigung für Raumenergie DVR), explains examples of space energy technologies that show **that the real solutions for the future come from this research area**. Dr. Ludwig draws from his rich fund of international journeys to conferences and meetings with inventors and from his own research.

Lakhovsky device with Tesla coils

This miracle of technology is based on the research of **Nikola Tesla**, used here for the healing of humans: With electrical impulses the cell process is activated and the self-healing is aroused.

Dr. med. Ingrid Höfeld-Keller is one of the few progressive doctors who use the device developed by the Swiss **Heinz Christian Tobler** in their practices.

Energy-efficient solutions ...

... presents **Dipl.-Ing. Johann Hein**, who, as a member of the Management Board of EuroSolar Austria, has extensive experience with the implementation of innovative business models and energy strategies in municipalities and regions. He describes the situation in Austria on the basis of numerous examples and shows how the future of energy self-sufficiency can look like and how important it is.

3 kW magnet motor from Georgia - with demo!

Daniel Youssefi, the inventor of this revolutionary autonomous 3-kW system for 230 V / 50 Hz, will personally present and demonstrate this device

at the congress! To supply an average house with electricity and heat, you need about three to four of these devices, which can already be purchased at a very acceptable price.

“Technologies for the future”

Convention from Friday, September 29th, till Sunday, Oct. 1th, 2017

Hotel Novapark, FischeraustraÙe 22, 8051 Graz/AT

Friday, September 29th, 2017

- 12.30 am **Welcome Address and Overview**
Adolf & Inge Schneider, Jupiter Publishing House, Zurich/CH
Greeting messages of the cooperation partners
- 1.00 pm **Results of the 25th World Clean Energy Conference WCEC in Geneva**
UNO Organisations und their experiences with oecological and environment issues
Gustav R. Grob, Dean, em., President of International Sustainable Energy Organisation ISEO
- 2.00 pm **Mobile und Stationary Applications of Methanol**
Energy change with a revolutionary energy source
Prof. Dr. Urs Weidmann, CEO of Silent-Power AG, Cham/Switzerland
- 3.00 pm **Remarkable Healing results with Cat purring Therapy Device**
New methods for treating severe diseases and for the enhancement of life quality
Joachim Galler, engineer/developer, Wien/**Dr. med. Fritz Florian**, book author, Graz/Austria
- 4.00 pm **Coffee break**
- 4.30 pm **Revolutionary Method for Enhanced Plant Growing - with film!**
Profitable biological crop with zero energy regarding the CO₂ issue and dark energy
Christina Florian, Dipl.-Educator, Graz/Austria
Fritz Florian, Dr. med./book author, Graz/Austria
- 5.15 pm **Importance of Material Recycling for the Economy and Society**
Savings of energy und ressources for an environment friendly world
Fabio Maggiore, Manager, ORIM S.p.A., Piediripa Macerata/Italy
- 6.00 pm **Dinner break**
- 7.30 pm **”Thank you for calling”, Excerpts from the Film to the E-smog Issue**
Neutralisation and conversion of Electrosmog into positive live energy
Peter Andres, CEO SwissMedTechSolutions GmbH, Zurich/Switzerland
Florian König, Dr. sc./Dipl.-Eng., FKE Enterprise GmbH, Germering/Germany

Conference language

German and english with simultaneous translation

Congress Place:

Hotel Novapark, Fischeraustr. 22, AT 8051 Graz/Austria

in Cooperation with:

International Sustainable Energy Organisation ISEO, Genf
The Slovenian Biomass Association SLOBIOM
German Association for Space Energy GASE/DVR www.dvr-raumenergie.de
Swiss Association for Free Energy SAFE www.safeswiss.ch
Schweiz. Vereinigung für Raumenergie SVR www.svrswiss.org

Saturday, September 30th, 2017

- 10.00 am **Weather Harmonizing with Desert Greening and Sphere Acupuncture**
Integral environment healing with Wilhelm Reich - new live in the desert!
Madjid Abdellaziz, Dipl.-Eng., Desert-Greening, Berlin/German/Zurich/Switzerland
- 11.00 am **Autonomous Generator for 7,5 kW from Zagreb/Croatia - with Demo!**
Energetic self supply with a free energy device
Rikarda Hrboka, Director, Innovatehno, Zagreb/Croatia
- 12.00 am **Lunch break**
- 1.30 pm **Reduction of Radioactive Radiation via Resonant Coupling**
New Insights to the functioning and effects of a stationary prototype
Gabriele Schroeter, Energy Researcher, New Politician World, Zurich/Switzerland
- 2.30 pm **New Results to Low Energy Nuclear Reactions LENR**
Promising experimental evidence and applications for energy consumers
Prof. Francesco Celani, Instituto Nazionale di Fisica Nucleare, Frascati/Italy
- 3.30 am **Coffee break**
- 4.00 pm **Collecting waste on islands and plastics on sea with ships**
How a vision is transformed into reality and how energy can be produced from waste
Dirk Lindenau, Dipl.-Eng., CEO Maritime Engineering & Projecting, Kiel/Germany
- 5.00 pm **Elementary Knowledge for Healthy Food and Green Energy**
Martina Sumenjok, president of SLOBIOM International Initiative for Organic Agriculture and Healthy Food, Renewable Energy and Raw Materials, Jarenina/Slovenja
- 6.00 pm **Dinner break**
- 7.30 pm: **Russian Autonomieous Hydraulic Energy Generator**
Presentation of the project and concepts for the market introduction of an hydraulic oscillator with piezoelectric energy conversion developed by **Dr. Vladislav V. Marukhin**, Moscow
Adolf Schneider, Dipl.Eng., CEO TransAltec Inc., Zurich/Switzerland

The Slovenian Biomass Association SLOBIOM
German Association for Space Energy GASE/DVR www.dvr-raumenergie.de
Swiss Association for Free Energy SAFE www.safeswiss.ch
Schweiz. Vereinigung für Raumenergie SVR www.svrswiss.org

Sunday, October 1th, 2017

- 10.00 am **Future Technologies for Sustainable Development in the Book of Synergy**
New types of systems for energy conversions
Achmed Khammas, translator/journalist/webmaster, Berlin/Germany
- 11.00 am **Space Energy Technologies - Energy Solutions for the Future**
Informations to the activities of the German Association of Space Energy GASE/DVR
Thorsten Ludwig, Doctor of physics, president GASE/DVR
- 12.00 am **Lunch break**
- 1.30 pm **Experiences with the Lakhovsky Multiwave Oscillator in the Praxis**
Electrical broadband impulses for activating and stimulating of cell metabolism
Ingrid Hoefeld-Keller, Dr.med., Saarbruecken/Germany
- 2.30 pm **Energy-self-sufficient municipalities and regions in Austria**
Innovative business models, strategies and practical examples
Wolfgang Hein, Dipl.-Eng., Eurosolar Austria, Wien/Austria
- 3.30 pm **Coffee break**
- 4.00 pm **MAGMOV: Autonomous 3 kW Magnetic Motor from Georgia - with Demo!**
Revolutionary Magnetic Electric Generator MAGMOV
Daniel Youssefi, Inventor, Tiflis/Georgia
- 5.30 pm: **Final Words, Convention Closing**

Exposition of Books, Demonstration Units and Products

Journals, books and products are available on the book and exposition tables. The speakers will demonstrate their models and prototypes and will answer the questions of the visitors.
